PREMIUM PLUS

Premium Plus shades have a very versatile and multi-purpose design that suits any need thanks to its diverse guiding options, its operating systems and its installing options. Its minimized design includes an extraslim cover that reduces the gap between brackets and is also visually delicate. Available in two different sizes depending on the shade measurements. A double shade that combines decorative with technical fabrics can be configured.

AVAILABLE COMPONENT COLORS

White RAL 9016	Black RAL 9011	Brown RAL 8019
Grey RAL 9006	Ivory RAL 1013	

OPERATING SYSTEMS

Chain   Crank   Motor

MAXIMUM WIDTH

4600 x 4600 mm

MAXIMUM HEIGHT

4600 x **4600** mm (indoor instal.)
4600 x **3000** mm (cable guide outdoor instal.)
4600 x **4000** mm (aluminum channel outdoor instal.)

❶ Check 'Fabric Limits' in ProArea.

PREMIUM PLUS

New prop side system

Bandalux has developed stronger idle ends to deliver benchmark endurance and reliability. It can be easily set up by a simple one hand move thanks to its internal compression spring.

Double drop (transmission)

Bandalux's new transmission delivers enhanced smoothness enabling two rolling tubes to operate with just one operating system. It also allows aligning both drops. It contains a solid system with high quality bearings that provides a perfect, smooth and silent (motion) rotation.

Minimum space between fabric and bracket

This light system design has been renewed to minimize the space between fabrics and, this way, reducing the GAP and the possible incoming light.
Optional pelmets and decorative covers

Premium Plus shades can be set with optional pelmets and decorative covers as a distinguishing element to enhance the system aesthetics. The Trazer pelmet and the Q-Box and Q-Style covers will highlight the shade's finishing and also personalizing its design or using one of the designs offered by Bandalux.

Trazer

Trazer Corner piece

Q-Box

Q-Style

# Junction profile for an easier installation

The junction profile compact design makes the system adjust to any kind of surface, facilitating its installation. Only available for Premium Plus I.

Two sizes

Different measures related to each shade size. A reduced size design and a totally flat cover provide a very light visual effect for the shade even in its larger size.

A : Premium Plus I
B : Premium Plus II
PREMIUM PLUS

Improved chain operating: rugged, smooth and durable

Smooth and silent drive, thanks to the use of materials that allow a high precision geometry.

The springs, of German technology and manufacture, calibrated and heat-treated, provide greater resistance to the system.

All elements susceptible to wear and tear are made of steel, thus ensuring the durability of the entire mechanism.

Maximum comfort and softness of use

Redux mechanism

The REDUX mechanism has an internal planetary gear system that reduces drive effort by up to 30%.

The planetary system requires a chain displacement higher than the height of the shade, so this system does not have mechanical stops to fix the end of the stroke at the top and at the bottom.

Note: Since the system has no limit switch, users need to be careful when operating the blind to keep the fabric from unrolling/rolling up too far.
Planetary

Redux
mechanism I

Redux
mechanism II

Assisted spring

Ideal to reduce the feeling of weight on shades larger than 5m^2 (with limit switch).

Example :
Effor when manoeuvring a 3,6 x 4m shade :

without spring : 4'8kg
with spring : 2'2kg
(with limit switch)

Child safety

Bandalux prioritizes security and therefore supplies by default a child safety system that holds the chain tight to the wall to prevent children from getting entangled in it.

Child Safety

Standard security device in the market that is served by default.

Safekids, patended by Bandalux

Highly efficient security device that ensures the attachement of the chain to the wall. The shade can only be operated if the device is installed.

Child Safety   Safekids

PATENTED BY
BANDALUX

Smooth and silent motorization

All Bandalux motorization products include a brand new, hybrid technology driving wheel specifically designed by us to minimize noise and vibration.

BANDALUX

New motorized option with external solar panel

NEW

The Bandalux Solar Station Kit offers a motorized, sustainable and self-sufficient Premium Plus solution powered by sunlight; no electrical installation required.

The kit includes a solar panel, a rechargeable battery and a motor, making it an eco-friendly and efficient choice that eliminates the need for electrical wiring.

To maximize sunlight capture, the solar panel and battery should be installed outdoors (e.g., on a façade or roof). The motor is built into the blind's tube or rod and connected to the solar panel with wiring.[1]

❗ (1) Includes a 500 mm cable. Compatible with an optional 3 m extension cable.

LYNX, smart blinds

The app that allows you to control all Bandalux window coverings solutions, wherever you are.

Easy. Comfortable. From anywhere.

See **LYNX** price list
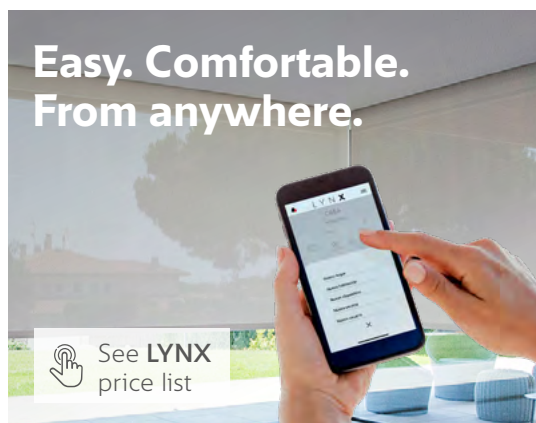

Available for Android and iOS. Compatible with:

amazon alexa   Google Home

Contactless comfort
Manage your blinds from your Smartphone or via voice control.

Atmospheres personalization
Program and automate as many scenes as you want and confirm the position of your blinds at any time.

Peace of mind
Enable presence simulation scenes when you are away from home.

Efficiency and savings
Take advantage of sunlight cycles, react to the climatic conditions and, as a consequence, save on your electricity bill.

Connected environment
In addition to blinds, LYNX allows you to connect other elements such as music, lamps, fans...

Customizable system

Color variety

Premium Plus shades offer a large range of colors (5 different) to personalize the operating system and its parts such as covers, brackets or chains.

Different bottom bar options

The bottom bar becomes a distinguishing feature for the shade's finishing :

Slim 25
Slim 35
Teardrop
Hidden
(ø 20 mm, ø 30 mm)
Mini Plain

❶ Exclusively for telescopic guide.

Double shade

Two shades on a single bracket that enables you to combine an opaque and a decorative fabric.
Optimal fabric fastening

This system offers multiple side guide options for either indoor or outdoor installations. Cable guides and aluminum side channels that improve raising or lowering the fabric efficiently as well contributing to minimize the GAP between the side guide and the fabric –one of Bandalux main priorities. The system is set with different types of side guides specifically developed depending on the operating system :

Cable guides, U-201 and U-301

Hold the fabric well and allow outdoor installation.

Cable
Floor

Cable
Wall

'U-201'
Low

'U-301'
Compact

R2 channel

Ideal for semi-hidden systems. The external channel adapts to wall irregularities while the internal channel adapts to the fabric drop.

'R2'
Telescopic
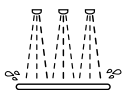

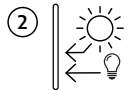

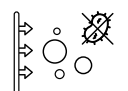

Air purifying shades

As a result of Bandalux' ongoing technological innovation and its commitment to sustainability, it has launched a new shade able to purify the air in any room.

Applicatio n of a nanocoating on the technical fabric

The shade is treated as follows:

① A mixture of oxide minerals is applied to the shade's fabric.

② This mixture is naturally activated by sunlight or artificial lighting.

③ When it is activated, any contaminant particles in the air are removed (viruses, bacteria, fungi, contamination, and volatile organic compounds).

Great versatility

· Applicable to all Roller Shades systems, Box range, Fit Box, Skylight and Sliding Panel.
· Available in the Polyscreen® 550 and Mega BO fabrics, in a range of colors.
