BOX SYSTEMS - Q-CASSETTE® 2

Strong and simple mounting

Bandalux has developed stronger idle ends to deliver benchmark endurance and reliability. It contains a solid system with high quality bearings that provides a perfect, smooth and silent (motion) rotation. It can be easily set up by a simple one hand move thanks to its internal compression spring.

Smoothen and silent motorization

All Bandalux motorization products include a brand new, hybrid technology driving wheel specifically designed by us to minimize noise and vibration.

Two shades, one operating system

Bandalux's new transmission delivers enhanced smoothness enabling two rolling tubes to operate with just one operating system. New bearings have been added to the mechanism to provide silent and perfect, concentric movement.

Height deviations may appear. These deviations are established according to EN13120 standard: $\pm 3\%$ for each fabric. Maximum height deviation between two fabrics being $\pm 6\%$

Easy installation

Both for ceiling and wall, the systems have been engineered to ensure a secure yet simple installation for indoor and outdoor applications. Both the Click-On brackets and the reinforced outdoor Slide-On brackets can be used for mounting on conditions that require either ceiling or front-wall installation. All while maintaining its aesthetic design.

Perimeter closure with a sill channel

For fully concealed systems, a profile is integrated to the base where the fabric lays to ensure a perimeter closure of the entire system in which the shade is integrated, reducing light leakage.

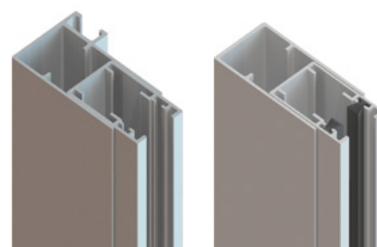

Optimal guide systems

Aluminum side channels

Engineered to work with semi-opaque systems. The external channel adapts to uneven wall surfaces and the interior channel adapts to the fabric.

R2 telescopic

BOX SYSTEMS - Q-CASSETTE® 2

Safety protection for children

In compliance with the updated child safety standard (ANSI/WCMA A100.1-2022), Bandalux supplies an improved Chain/Cord Tension Device by default.

This device is designed to eliminate free hanging cords and connectors in order to be fully tensioned and fixed to the wall with the aim of preventing children from getting entangled in it.

Features of the new Child Safety Device:

- Easy device assembly.
- Quick installation.
- Smooth and reliable performance.

Even the smallest details are considered

Component color combination

Bandalux combines its style with all the system components to deliver best in class products.

OPTIONS

Standard configuration

Colors

By default, Bandalux will provide the Q-Cassette® 2 in white unless a different color is indicated on the order form or eBa.

Chain operated

Mini Plain bottom hembar

Chain Tension Device

Optional configuration

BOTTOM HEMBARS

Slim 35

Euroslim

Mini Plain fabric wrap

Only available for free drop.

Ø³/₄" and Ø¹₁₆" Round fabric wrap

Optional configuration

Metallic chain

Profile special color

Customized hardware colors available upon request. RAL number must be indicated.

Aluminum side channels (indoor installation)

R2 Telescopic lateral

Only compatible with Mini Plain and Euroslim bottom hembars. / Maximum height: 137".

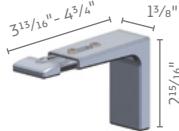

Sill bottom for R2 Telescopic channel

Additional brackets

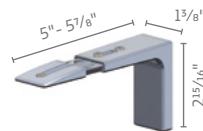

Wall/Ceiling indoor installation

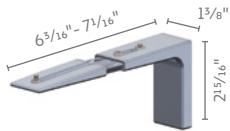

3¹³/₁₆" - 4³/₄" telescopic reinforced bracket

5" - 5⁷/₈" telescopic reinforced bracket

6³/₁₆" - 7¹/₁₆" telescopic reinforced bracket
